

Role Profile: Infrastructure Engineer

Vacancy Description

Amiosec is an exciting and growing UK technology company with innovation, agility and state of the art technology at its core. We work in partnerships with UK government customers and commercial providers to deliver research, technology and products in the communications security sector.

We have a vacancy within the Operations team and are looking for a highly competent Infrastructure Engineer to join the team and support the continued growth of the business.

The successful candidate must have experience of installing, supporting, maintaining and developing internal systems; delivering internal and customer delivery projects; support across all or our product portfolio and ensuring best security practices are adhered to throughout.

The candidate must have experience in a production, operations or engineering environment and have rigorous attention to detail and be familiar with Infrastructure Build, Power Management, monitoring tools, security best practices, Service Management frameworks, Linux and Windows Sever, Hosted Applications and have advanced troubleshooting skills.

Due to the nature of our work, all candidates will be required to obtain and maintain an appropriate UK security clearance.
