

Role Profile: Junior Project Manager

A bit about us...

Amiosec is an exciting and growing UK technology company with innovation, agility and state of the art technology at its core. We work in partnerships with UK government customers and commercial providers to deliver research, technology and products in the communications security sector.

Vacancy Description

We are looking for a Junior Project Manager to join the Amiosec team and support the continued growth of the business. You will be joining a Project Delivery Team that is responsible for the delivery of customer funded research and development projects. Main responsibilities will include supporting the Project Managers and providing support to maintain project data. The role will report to the Amiosec Head of Programmes.

NOTE: Due to the nature of our work, all candidates may be required to obtain and maintain an appropriate UK security clearance.

Subject Area	Activities
Reporting and Administration	<ul style="list-style-type: none"> • Support Project Managers to produce monthly progress status reports as required by the business, utilising the corporate tools to provide evidence-based summaries. • Provide project planning and support on activities including bids and proposals, internal research & development, and customer funded development.
Team Activities	<ul style="list-style-type: none"> • Working hand in glove with the relevant Technical Lead • Involvement in stand-ups providing latest updates • Working alongside other teams to resolve known problems and on continual improvement initiatives • Helping assist with Urgent Requirements <p>Note - Line Management of the Delivery Team will be undertaken by appointed Technical Seniors.</p>
Core Competencies	<ul style="list-style-type: none"> • Enthusiasm for implementing best practice project management methodologies with a desire to deliver as per business requirements. • Flexible approach and willingness to try new tools/techniques/methods. • Excellent attention to detail with strong organisational and communication skills, with the ability to build a rapport across the business. • Ability to work individually or as a member of a multi-disciplined team.

	<ul style="list-style-type: none"> • Ability to create and build positive working relationships with colleagues from all backgrounds. • Strong problem solving and enabling ethos/approach. • Highly organised, personable, with a demonstrable ability to manage a variety of tasks at one time. • Willingness to engage with the team and help contribute to shared goals. • Self-motivated. • Presents and conveys information clearly and articulately. • Good time management skills, with ongoing ownership of own deliverables as and when required. • Excellent communication skills (including generation of written content). • Ability to investigate and understand customer requirements.
<p>Technical Competencies</p>	<p>The sections below outlines typical competencies that we are looking for. These are wide-ranging and represent the full cross section of capabilities that we seek. Prospective candidates should be able to demonstrate ability in a number of the technical competencies (depending on grade/experience) and as a minimum, satisfy the core competencies as listed. We are not looking for full coverage across all of them in any one candidate.</p> <ul style="list-style-type: none"> • Whilst not a necessity, a technical background would be highly desirable. • Ability to learn quickly and adapt to new software or tools. • Basic understanding of project management methodologies (Agile, Waterfall, etc.). • Previous experience of working in the Cyber Security environment is desirable.
